

Brief CV

Name/中文姓名	Jinbao JI/纪金豹	Gender	Male	
Title (Pro./Dr.)	Professor	Country	China	
University/Department	Structure experimental center, Department of urban construction, Beijing University of Technology			
Personal Web Sites	http://ceet.bjut.edu.cn/			
Research Area	Structure experiment, Structural control, Structural Monitoring			
Brief introduction of your research experience: Prof. Jinbao JI's research has been primarily in the areas of structural dynamic experiment, structural control and monitoring et al. Dr. Ji has presided over 3 projects of National Natural Science Foundation of China, participated in more than 20 projects of National Natural Science Foundation of China, Beijing Natural Science Foundation of China, Beijing Municipal Education Commission project and so on, presided over 30 research projects of complex structure analysis and test, structure control and engineering monitoring entrusted by enterprises, and developed the inverter MR damper, multi parameter control of shaking table and substructure shaking table test based on AMD device and several sets of structural test control software were developed. He has awarded the Second Award of the Scientific and Technological Progress of the State in 2008 and a special award of the Scientific and Technological Progress of China Railway Construction Corporation in 2007.
